# Underground Mains Warning Tape »

## Product Overview

*Introducing the 'New' Slegers range of Underground Non Detectable Warning Tapes.* Our Underground Warning Tapes are a coloured low density polyethylene tape that has a printed warning message, it is the most economical way of warning excavators of buried services below ground. Designed to withstand the elements, Slegers warning tapes are the first line of defense against intrusion on buried services. Our range of Slegers warning tapes have passed rigorous & stringent testing for colour fastness and durability and is manufactured in accordance with AS2648.1:1995

## Features

- » Creates a margin of safety between tape & buried line
- » Manufactured in accordance with AS2648.1:1995
- » High quality low density polyethylene
- » Quality Australian Made
- » Lead free pigments with virgin grade film ensure colour vibrancy
- » Material and ink will not degrade when exposed to outdoor elements
- » Soil tolerance from - pH 2.5 to pH 11.0 inclusive
- » Quick & easy to handle
- » Roll Sizes 150mm x 500m
- » Orange Electrical & White Communications Cable Identification warning tapes

## Applications

- » A simple & economical way to protect buried utility lines
- » Easy to install can be placed in ground at the same time pipe & cable is buried
- » Should be installed approximately 12" to 18" below the ground surface & 12" directly above buried services before final backfilling
- » Used in construction, CATV, utilities, and by pipeline & mechanical contractors
- » Quickly warns excavation crews of the existence of buried services before any damage can occur to the line and / or workers.
